Audio Monitoring Enhances Safety and Security for Patients and Providers

As healthcare facilities require a heightened level of physical security, administrators are looking for new technology that not only protects their campuses, but is also faster and more effective than systems in the past.

Louroe Electronics' audio solutions have been installed in hospitals, long-term care facilities and other healthcare facilities around the globe to increase both security and service of patients and healthcare staff. Audio solutions helps staff speak quickly and easily with patients. Frequently used at nursing and technician stations, two-way audio systems allow personnel to communicate with patients at the touch of a button and patients can respond hands free.

Sleep Study Observation and Communication
