

High Volume Alert-To-Action
Incident Communication

TLO-A (LE-087)

The Premiere Speaker / Microphone Solution
For Your Retail Establishment Safety Needs

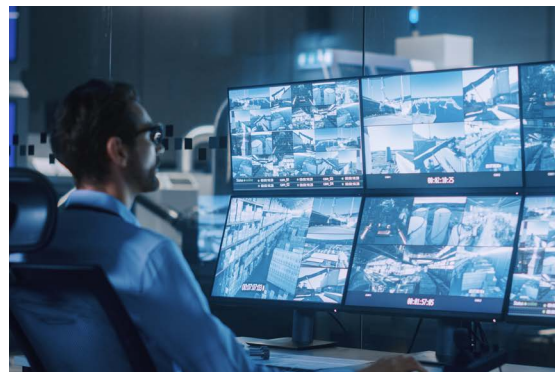

The TLO-A, a **two-way communications** device featuring an active speaker for high volume penetration and a microphone for superior sound capture, together in a single, weather-resistant housing.

Intended for outdoor or large coverage applications, the TLO-A **provides both listen and talk-back capabilities** eliminating the need of a mid-span audio amplifier or interface device.

The omni-directional microphone picks up audio within a 30-foot diameter of the device and yields exceptional line-level audio output. The TLO-A can be seamlessly integrated with other audio receiving devices such as DVRs, IP Network Cameras and Video Servers.

Features:

- Heavy duty ABS resin horn speaker with microphone within unit
- Omni-directional microphone, within 30' diameter
- Weather resistant – Indoor or Outdoor use
- Line Level Output (0dBV) from Microphone

Remote Monitoring
