

VeriFact® L-DT (LE-079)

Bi-Directional Microphone

The VeriFact® L-DT microphone is designed as a bi-directional microphone where sound pick up is more in the front or back of the housing and less on the sides. The nonslip bottom adheres to desktop or flat horizontal surfaces. This has two opposite facing, omni-directional electret condenser microphones, with built in preamp. It offers an exceptional durability thanks to its robust design and is easy to install.

Features:

- Two opposing built-in microphones
- Non-slip bottom for firm adherence to surfaces
- Pre-amplified for line level output
- Pickup pattern is within 10' of the microphone element

Remote Monitoring

**Pairs with IF-PX (LE-520)
for Line Level Mics**
